Digital Literacy Quiz

Project Report

In this project, I used multiple digital platforms such as Google Forms, Google Sheets, and email tools to understand and practise essential digital communication and online safety skills. I created a Digital Literacy Awareness Quiz using Google Forms, which helped me learn how to design surveys, structure questions, and collect responses efficiently. By linking the form to Google Sheets, I also explored how data is automatically recorded and organized, making it easier to analyze responses. Additionally, I practised writing professional emails, which improved my formal communication skills—an important aspect of academic and professional life.

Through tasks like creating checklists for cyber safety and responsible social media use, I gained a better understanding of online risks and prevention strategies. These tools will help me academically by improving my ability to communicate clearly, manage information, and present data effectively. Overall, this project enhanced my digital literacy, which is essential for completing assignments, collaborating with peers, and preparing for future career opportunities.
